

VDL KTI

Strength through co-operation

VDL KTI

IN THE WORLD OF OIL, GAS AND PETROCHEMICALS INDUSTRIES THERE ARE NO BOUNDARIES. WHEN IT COMES TO THE SUPPLY OF CRITICAL COMPONENTS, VDL KTI HAS PROVEN ITS OWN QUALITIES AS A SUPPLIER TO A SIGNIFICANT NUMBER OF PROMINENT BUSINESSES IN THIS SECTOR. OUR UNIQUELY BROAD RANGE OF PRODUCTS AND SERVICES AND PARTICULARLY KEEN PRICES MAKE US AN ATTRACTIVE PARTNER NOT ONLY FOR OIL, GAS AND PETROCHEMICALS COMPANIES, BUT ALSO FOR MAIN CONTRACTORS OPERATING IN THESE SECTORS.

When it comes to critical components, our clients - and we ourselves - prefer to avoid any risk. We therefore utilise our extensive professional expertise and experience to make practical innovations from which you may benefit. Not only does this imply that we complete the process from awarding to production more swiftly, but direct links between the engineers and production departments also ensure that the proposed details of execution, improvement and innovation are actually feasible.

A DEAL IS A DEAL

Quality and time are key words, both to you and to us. We are therefore properly organized to focus on a reliable delivery complying with the highest standards. The project manager can therefore inform you of the current status of your order whenever you may choose. In terms of timely delivery, you obviously benefit from our central location within Europe and the excellent rail, road and waterway connections it offers to all major industrial hubs. And to provide additional assurance, we have established a reliable supplier network, which shares and fully supports our opinions with regard to quality and timely delivery.

EXTENSIVE PRODUCT RANGE

Established in 1973, VDL KTI has developed as a specialist in a substantial range of products and production techniques. Our product range varies from equipment, such as pressure vessels, columns and shell/tube heat exchangers to modular processing units. But also from radiant coils, convection coils and piping systems to modular fabricated industrial furnaces. VDL KTI is familiar with the manufacturing of both standard and non-standard materials.

SPECIALIST PROCESSING

VDL KTI's outstanding reputation is partly based on our exceptional expertise in various disciplines. For instance, our experts can perform critical welding operations in even the most difficult positions and conditions. We therefore possess the most highly advanced equipment. By continuing to invest in innovation - and automation in particular - we are able to manufacture more efficiently, thus maintaining our competitive edge. In our workshops other metalworking processes take place. These include drilling, cutting, rolling, bending, turning, milling and postweld heat treatment.

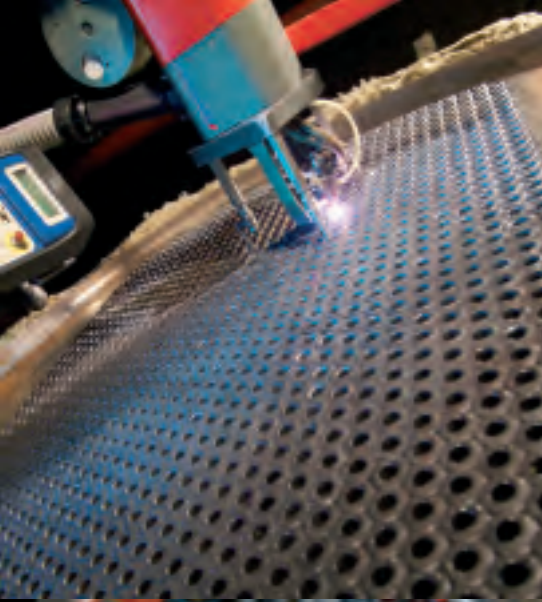

SPACE FOR SUBSTANTIAL DIMENSIONS

Our workshops are also ideally equipped to fabricate large-scale components. Dimensions can go up to 35m long, 6m high and 5m wide. The maximum diameter of the products we can manufacture is 4.5m. The wall thickness may be anything up to 100mm, while the maximum weights range from 100 tons for equipment to 300 tons for modular units.

FAMILIAR WITH A WIDE RANGE OF MATERIALS

Our experienced workforce are fully acquainted with the requirements applicable to a range of materials, such as carbon steel, CrMo alloys, stainless steel, duplex and clad steels. Special materials, such as Hastelloy and Incoloy are also frequently processed.

SURFACE TREATMENT

Following production, we can also perform surface treatment. VDL KTI also has the on-site facilities required to blast, paint or coat your products.

QUALITY

Our sound reputation can be largely accredited to our continuous attention to quality assurance, which we safeguard by constantly applying the most stringent requirements and standards. VDL KTI holds the following certificates: ISO-9001; TÜV - AD-2000 HP-0; ASME stamp U - U2 - S and Lloyds qualification class 2, fusion welding. We can also provide designs in accordance with the following codes: ASME IVIII-Div.1-2; AD 2000, RTOD, Codap, PD5500, PED and TEMA.

KEY PHRASES

- Engineering supported
- Preferred supplier to the oil, gas and petrochemicals industries since 1973
- Dimensions of up to 35m long, 6m high and 5m wide
- Wall thicknesses up to 100mm
- Welding, drilling, cutting, rolling, bending, turning, milling and postweld heat treatment PWHT
- Familiar with a wide range of materials
- Extensive range of products / services
- High Quality Assurance Level

VDL Groep

VDL KTI is part of VDL Groep, an international company with approximately 7,300 employees, spread over 73 subsidiaries in 15 countries. The strength of the co-operation within VDL Groep offers added assurance in terms of continuity to customers and suppliers of VDL KTI alike.

VDL KTI operates in the finished products sector. This sector comprises suspension systems for the automotive industry, production automation systems, heating, cooling and air-technical systems, systems for the oil, gas & petrochemical industry, sunbeds and roof boxes, systems for the agricultural sector, cigar-making and packaging machines, container handling equipment, medical systems and production systems for optical media.

The other sectors comprise supplies and buses & coaches. In the supply sector, VDL specialises in metalworking, plastics processing, system supply and surface treatment. The bus & coach division includes coaches, chassis modules, public transport buses, mini & midi buses.
